About Freenome

Freenome is an early cancer detection company developing blood-based screening tests to identify cancer in its earliest, most treatable stages. The company's proprietary multiomics discovery platform analyzes circulating cell-free DNA methylation patterns at single-base resolution alongside additional biomarkers to detect multiple cancers. Freenome's development of SimpleScreen™ CRC for colorectal cancer screening and a pipeline of tests for lung cancer and additional indications is designed to increase cancer detection among millions of at-risk individuals.
